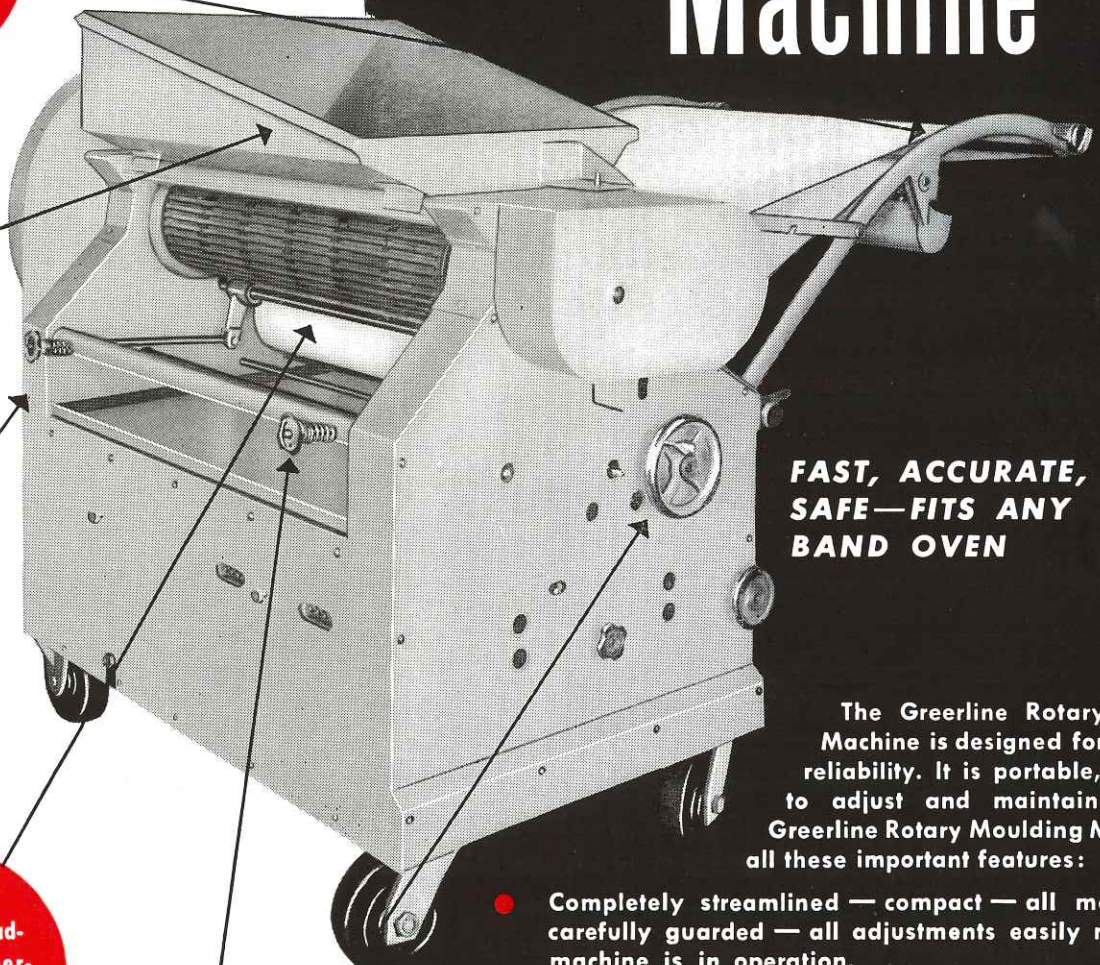
GREER

MAKE CLEAN, CLEAR COOKIES OF ANY DESIGN....WITH GREER Rotary Moulding Machine



1 Hinged delivery extension supports apron. Apron feeds directly onto oven band.

2 Removable steel hopper equipped with welded safety bars.

3 Main frame of sturdy, welded steel —mounted on 8" ball-bearing casters.

4 Ball-bearing, adjustable rubber-covered roll removes dough from die roll.

5 Die roll scraping knife has vertical and horizontal adjustment.

FAST, ACCURATE, SIMPLE, SAFE—FITS ANY BAND OVEN

The Greerline Rotary Moulding Machine is designed for speed and reliability. It is portable, safe, easy to adjust and maintain. Only the Greerline Rotary Moulding Machine has all these important features:

- Completely streamlined — compact — all moving parts carefully guarded — all adjustments easily made while machine is in operation.
- Variable speed drive equipped throughout with self-aligning, dust-sealed, grease-packed ball bearings.
- 5 HP motor—variable speed drive. All driving mechanism totally enclosed.
- Push-button motor control switch.
- Die roll bearings split and hinged for easy, quick removal of Roll.
- Can be used with band ovens of any length.
- Weight — 2800 lbs.; 32" and 38" belt widths.
- Complete portability adds flexibility to band oven operation.

Enjoy better production at lower cost by installing a *Greerline* Portable Rotary Moulding Machine in *your* production line!

DON'T JUST STREAMLINE YOUR BAKERY — *Greerline* IT!

GREERLINE BAKERY EQUIPMENT

MANUFACTURED BY J. W. GREER COMPANY

- Automatic Biscuit Stackers
- Band Ovens — (Steel Band and Wire Mesh)
- Bar Machines
